Art Unit: 1775

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 11-12, drawn to an article, classified in class 52, subclass 506.1.
- II. Claims 9-10, drawn to a method, classified in class 52, subclass 742.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions differ in that the article of Group I forms a laminate comprising a cement board having a resin and inorganic particles formed thereon whereas the method of Group II recites that a cement board is engraved or embossed wherein a stencil is used to fill a cavity on the board with a decorative filler. Group I has no limitations directed to engravings, embossments or cavities which are subsequently filled with filler materials.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Isabelle Chabot on 6-13-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason L. Savage whose telephone number is 571-272-1542. The examiner can normally be reached on M-F 6:30-4:00.
